C# | SQL | ReactJS | HTML | CSS | Javascript | Android Studio | PHP | QA | Adobe Photoshop

Summary

Recent graduate from NAIT's Digital Media & IT program. Passionate about turning ideas into action, and always looking to learn new concepts. A strong collaborator who writes well-documented code and communicates effectively. Takes an analytical approach to ensure positive user experiences. Confident my skills would be an asset as a junior software developer.

Education

NAIT – Northern Alberta Institute of Technology

Sept. 2018 – Current | *Digital Media & IT – Software Development*

- Completed classes such as: Web development, PHP & MySQL, Javascript, and Quality Assurance & Software Testing
- 3x Dean's Honour Roll: Awarded to those with exemplary academic standing

Coursera Certificate

Jul. 2020 – Aug. 2020 | *Industrial IoT on Google Cloud Platform*

- Earned certificate for successful completion of Google Cloud course on the Industrial Internet of Things. Solidified understanding of data pipelines, storage of user data, and querying the data to discover creative solutions to problems.

Projects

Egg Catch Android Game

Apr. 2019

- Expanded my knowledge of Android development through the pursued interest of creating a mobile game; assembled entirely within Android Studio (Java & XML).

Online Storefront

Sept. 2020 – Oct 2020

- Created a mock online store to familiarize myself with React web development; solution consisted of a ReactJS & Apollo Client (front-end) and GraphQL & Prisma (back-end) tech stack.

Work Experience

The Source

Aug. 2014 – Aug. 2018 | Sales Representative

- Adapted to a fast-paced environment and kept up to date on a plethora of emerging tech. Developed the skills required to troubleshoot any challenges customers presented me with.
- Maintained a 97% customer experience score based on feedback. Outfitted me with the soft skills necessary to be a team player and create memorable interactions.
